CAREER PROFILE

Experienced financial professional aiming to leverage prior experience in order to multiply impact in a Software Development career. Motivation to change paths driven by: witnessing the marketplace trend of increasing needs for skillful software developers, a desire to grow professionally within an industry that fosters continual changing and learning, and a deep interest in solving problems and building models, features, applications, or websites that provide pragmatic utility and aesthetic interfaces.

Prominent strengths include intellectual curiosity, strong relationship management, and problem solving. Excited to expand learning and self-development in a software-related role, as well as applying directly-transferable skills obtained in over two years of Financial Planning & Analysis; these include: principles of design and user interfaces in terms of Excel financial models and presentation materials (especially PowerPoint), logical problem solving in business case analyses, and relationship management working across several areas of an organization in order to provide insightful business decision support.

- HTML
- CSS (Grid, Flexbox)
- JavaScript

PROJECTS

Gilded Investment Tips
Overview: First project-based learning attempt. Aimed to create a tool to provide investment options relative to an investor's general situation, based on modern portfolio theory.
Live version: https://romantic-fermi-4b3ed3.netlify.app/
Code: https://github.com/JohnIntihar/gildedinvestmenttips
- Allowed implementation of basic HTML, CSS, and JavaScript.
- Learned principles of pseudocode, debugging, arrays, forms, and writing clean code.

Responsive Website
Overview: Guided project for building a website that adapts to desktop, tablet, and mobile displays.
Live version: https://elastic-villani-e4c899.netlify.app/docs.html
Code: https://github.com/JohnIntihar/responsive-modern-website
- Learned relevant CSS techniques such as using Grid, Flexbox, animations, and media queries in a modern website design layout.
- Practiced utilizing CSS variables for efficiency in updating website design and color schemes.

Restaurant Menu
Overview: Guided project for utilizing JavaScript in order to dynamically update, filter, concatenate, and change array items.
Live version: https://tender-tereshkova-e81cad.netlify.app/
Code: https://github.com/JohnIntihar/menu-items
- Further practiced JavaScript techniques for working with arrays.

EXPERIENCE

PMMC – Charlotte, North Carolina   *12/2019 – Present*
Financial Planning & Analysis Analyst
- Directly support the CFO and COO with monthly close, annual audit, fiscal planning, presentation materials for the Board of Directors, and ad hoc requests (market research, DCF analysis in a 409A model valuation, product-level P&L creation, proforma forecasting, etc.).
- Create a concise and insightful reporting package for the senior leadership team that provides easily-actionable recommendations for controlling expenses and empowers leaders to be more prepared for budget and hiring inquiries from their teams.

THE VANGUARD GROUP – Malvern, Pennsylvania   *04/2018 – 11/2019*
Financial Planning & Analysis Associate
- Assisted in establishing procedures and financial modeling infrastructure for budget variance reporting and cash flow analysis to a division overseeing $2T of Assets Under Management and typically 50%-80% of the organization's annual cash flows on an annualized basis.
- Applied working knowledge of business economics and the competitive landscape in order to provide senior leadership with focused and actionable insights into their market position, allowing for more informed strategic decision making.

EDUCATION

UNIVERSITY OF WISCONSIN - RIVER FALLS – River Falls, Wisconsin   *Graduated 12/2014*
BS Business Management
- The Association to Advance Collegiate Schools of Business (AACSB) Accreditation.
- Study Abroad Program 2013 Fall Semester - Dalkeith, Scotland.
